

Safety precautions for silicone-based impregnation

1. General information

Use the impregnation only outdoors or in well-ventilated areas.

Keep the product away from open flames, sparks and heat sources.

2. Personal protective equipment (PPE)

Respiratory protection: In case of insufficient ventilation, use a respirator mask with an organic filter (A2).

Eye protection: Wear safety glasses to avoid splashing in the eyes.

Hand protection: Use chemical-resistant gloves (e.g. nitrile or butyl rubber).

Body protection: Wear long-sleeved clothing and closed-toe shoes to prevent skin contact.

3. Handling and use

Shake product thoroughly before use and use according to manufacturer's instructions.

Avoid direct contact with skin and mucous membranes.

Immediately absorb and properly dispose of any spills with absorbent material.

4. Health and environmental protection

Vapours may cause dizziness or headaches – avoid inhalation.

In case of skin contact, the product may cause irritation or allergic reaction.

Do not discharge into drains, soil or natural waters – the product is harmful to the environment.

Dispose of surplus and empty containers in accordance with local regulations for hazardous materials.

5. Emergency measures

In case of skin contact: Wash off with plenty of soap and water. If irritation develops, seek medical attention.

In case of contact with eyes: Rinse eyes thoroughly with water and seek medical advice.

If vapours are inhaled: ensure supply of fresh air. Seek medical attention if you feel unwell.

If swallowed: do not induce vomiting; seek medical attention immediately and show the label.

6. Storage

Store the product in a cool, dry and well-closed container. Protect from frost.

Keep away from food, drink and unauthorised access. Close containers tightly after use and store in a secure place. Adherence to these safety regulations minimises risks to health and the environment when working with silicone-based impregnation.
